Carton weigher-filler with an exit chain conveyor

Carton weigher-filler

The carton weigher-filler is a machine that is used for filling in bulk with a predetermined weight, at the exit of a sizer. The weighing and filling of the boxes is done simultaneously. A progressive and uniform filling is achieved by moving the carton as it is filled.

FEATURES & BENEFITS

- There is the possibility of incorporating a pneumatic shaker to improve the distribution of the fruit in the full cartons.
- The machine can store 10 different carton formats for filling. The standard speed depends on the size of the boxes to be filled.
- Highest quality standards to ensure long durability.
